Overview

Self-adhesive switchable smart film

Designed to retrofit to existing transparent surfaces, our Self-Adhesive Switchable Film provides a simple and cost effective alternative to other switchable film technologies.

It is manufactured with a self-adhesive cling layer on one side (peel and stick) which makes it easy to apply to both new and existing glass (no specialist installation equipment required). A simple ON - OFF mode switches the film from being frosted to clear. In its frosted state, the film acts as an electronic blind providing privacy and security for any glass, window or partition.

Self-adhesive switchable film is available in two standard widths 1000mm (38.6") and 1200mm (47.3") and can be cut to any size. Custom shapes and sizes are available and multiple pieces can be joined together to create large switchable glazed panels or partitions.

This unique film technology also transforms any glass into a high definition rear projection screen allowing you to display corporate presentations, TV images and videos. A truly innovative product making switchable glass technology accessible to everyone while giving your home or business the added WOW factor.

Features

- Self adhesive film – thickness 0.75mm
- Maximum single piece 1.2 x 3.0 metres
- Multiple pieces can be joined on glass walls & partitions
- Operating power 110VAC, frequency 50/60Hz
- Power used 12 watts & current 0.1 amperes per m²
- Custom film sizes made to order

Benefits

- Switches from clear to frosted
- Panel size up to 3 metres (118")
- Standard panel widths: 1000mm (39") / 1200mm (47.3) / 1500mm (59")
- Easy to install
- Easy maintenance and cleaning
- Low energy consumption

Applications

- Privacy / security glass
- Windows / glass partitions
- Sky lights / vision panels
- Counters / furniture
- Conservatories / sunrooms
- Video projection screen
- Smart Film Installation
- Electronic blinds / doors
